

Gel joints Break

Fastest way to make an underground connection!

No expiration date

IP 68

For underground installation

UV- and chemical resistance

Gel joints Break series is suitable to guarantee insulation of low voltage main and shunted, single-pole and multi-pole connections ranging from 0,6/1 kV.

The list of products is made up of a series for main connections and a series for shunted connections. The first series allows single-pole and multi-pole connections with max. section respectively of 1x185 mm² and 4x25 mm²; the second series allows single-pole and multi-pole shunted connections with max. section respectively of 1x120 mm² e 4x10 mm².

The insulation phase in each joint is made with a separator included in the kit or with the innovative modular insulated terminals, up to five phases with max. section of 35 mm².

Technical specifications

- Protection degree IP68
- Operating temperature from -20 °C to +90 °C

Regulations compliance

- EN 50393 (0,6/1 kV)
- EN 60529
- RoHS Directive 2011/65/EC
- 20-37/2-1, 20-37/7
- EN 60695-2-11

Break 25

Break 30

Break 50

Break 50Y

Break 100

Package (pcs)	4	5	3	1	1

Dimensions

Installation

1. Strip and crimp wires.

2. Dip connection in the gel and block wires at the ends with the included tie-wraps.

3. Verify clip closing and gel overflowing in wire input/output points in order to guarantee a perfect watertight seal.

Components and characteristics

- Two polypropylene hinged shells with patented watertight system, made up of a longitudinal ribbing (1) functioning as the gel containing bulkhead. At both ends there are pre-fractured walls (2) that allow gel overflowing, ensuring a good water tightness.
- Wire slipping is avoided in longitudinal direction thanks to ribbing (3) at the ends of the shells and in transversal direction thanks to wire fixing with tie-wraps included in the package.
- Patented separator made up of two notched plates that allow a reciprocal jointing and two protrusions that block the plates.
- There are two holes at the ends of each model in order to insert and fix tie-wraps. Joint opening can occur only using a tool according to norm CEI 64-8.

Kit content*

- Shell
- Tie-wraps
- Separator

Advantages

- Re-enterable connection
- High mechanical strength with wide range of operating temperature
- Fast laying
- Cross-linked gel in the two shells (avoiding additional casting)
- Versatility of application, even in submerged conditions
- High watertight properties
- High dielectric strength
- Non sliding wires
- High strength against chemical agents or UV rays
- No expiration date
